fullDescriptionUnstructured: 25-28 cm. El pico es color negro, delgado y recto; las patas son de color amarillo y son largas. Por encima el cuerpo es color café grisáceo punteado y barrado de blanco; por debajo de color blanco, ligeramente estriado y punteado de pardusco en el cuello y en los lados del pecho. En vuelo se notan las alas oscuras (sin lista blanca) y la cola y la rabadilla son color blanquecino (Hilty y Brown 2001).

## ancillaryData

dataObject:  
additionalInformation: Registros biológicos: Colección Ornitológica del Instituto de Ciencias Naturales de la Universidad Nacional de Colombia.  
Recursos multimedia: En Xeno-Canto Foundation se encuentran archivos de sonido de esta especie.  
Créditos específicos: Al Instituto Amazónico de Investigaciones Científicas Sinchi. Al Sistema de Información Ambiental Territorial de la Amazonia Colombiana SIAT-AC. La elaboración de esta ficha fue posible gracias al apoyo del gobierno de Finlandia a través del convenio entre la Secretaría General de la CAN y el Instituto Sinchi para el proyecto "Definición y conformación de la PIRAA, a partir del fortalecimiento del nodo subnacional de Colombia: Sistema de Información Ambiental Territorial de la Amazonia Colombiana SIATAC", como parte del desarrollo del programa BIOCAN. A Thomas McNish por la fotografía de esta especie.
