fullDescriptionUnstructured: Mide 16.5 cm. y pesa 37.5 grs. Ningún otro pinzón de áreas abiertas en áreas húmedas tiene la cabeza con un listado prominente y la espalda uniforme; no hay traslape con *Arremonops rufivirgatus*, que es más pequeño (Elizondo 2000). Los adultos muestran la cabeza gris, una lista negra gruesa a cada lado de la coronilla, y una más angosta a través del ojo. El resto de las áreas superiores son verde oliva. El borde del hombro es amarillo y la garganta y el abdomen son blanco opaco, que se torna gris pálido en los flancos y coberteras infracaudales oliva. El iris es café rojizo, el pico es negro y las patas son entre color carne grisáceo y fusco (Elizondo, 2000). Los ejemplares juveniles presentan la cabeza oliva amarillenta, con listas café oscuras y un rayado fusco y fino. El resto de la región superior es color oliva parduzco con un listado fusco. Por debajo es oliva amarillento, con un tinte café en el pecho y los flancos y un listado café oscuro. El pico exhibe la base amarilla. El plumaje de adulto se adquiere a los 4 ó 5 meses (Elizondo 2000).
