distributionUnstructured: Esta especie se distribuye a lo largo de la Costa Atlántica de Norteamérica desde Maine central hasta el sur de Georgia, alrededor de las costas de Florida y a lo largo de la Costa del Golfo a sur de Texas. En México se encuentra desde las islas de los estados de Campeche y Yucatán hasta las costas del norte del golfo de California y sur de Colima. También en las Antillas, desde las islas Bahamas hacia el sur a través de las Antillas Menores, así como en Aruba, Bonaire y en islas costeras de Venezuela; migra a ambas costas de Centro y Sudamérica hasta Chile (Zamudio, 2012). En Colombia está presente en ambas costas; unos pocos registros en el interior: Valle del Cauca en Cartago y la Laguna de Sonso, Boyacá (Laguna de Tota) y Antioquia (Medellín), Cauca (Popayán), bocas de Aracataca y Buritaca (Magdalena) (Zamudio, 2012).

Se distribuye desde el nivel del mar hasta los 3000 msnm (Hilty & Brown, 1986).

abstract: La Gaviota Reidora mide aproximadamente 40 cm; ambos sexos son similares. Los adultos (plumaje de invierno): cabeza, cuello, rabadilla, cola, región ventral y bordes posteriores de las alas blancos; los lados de la cabeza y la nuca moteados indistintamente con fusco; manto gris oscuro, las puntas de las alas negras. Pico y patas negruzcos. El plumaje de cría difiere de tener la cabeza completamente negra, el pico y las patas rojos oscuros. Los juveniles son similares a los adultos en plumaje invernal pero con las remeras fuscas, contrastando con el manto y con una banda subterminal negra en la cola (Asociación Bogotana de Ornitología, 2000; Dunn & Aldefer, 2006). Es una especie transeúnte y residente de invierno; común en ambas costas (Hilty & Brown, 1986); generalmente habita en áreas de agua abierta en lagunas o humedales, descansando sobre el agua lejos de la orilla o sobre postes (Asociación Bogotana de Ornitología, 2000). Se alimenta de carroña, peces pequeños e insectos, los cuales a veces captura en el aire (Asociación Bogotana de Ornitología, 2000). La Gaviota Reidora tiene un amplio rango de distribución; la tendencia de la población está incrementando, por lo cual se encuentra en categoría de Preocupación Menor (BirdLife International and NatureServe, 2014).
