habitatUnstructured: El Turpial Real habita en matorrales áridos, montes secos, selva de galería, cactus gigantes y llanos en el norte de Arauca (Hilty & Brown, 1986); también frecuenta bosques caducifolios, áreas abiertas con árboles aislados (McNish, 2007); y sabanas chaqueñas (Narosky & Yzurieta, 2010). También se pueden ver en plantaciones de frutales y jardines (EOL, n.d.).

fullDescriptionUnstructured: El Turpial Real mide 23 cm aproximadamente; tiene pico robusto y cónico gris azuloso, ojos amarillos rodeados por una extensa área desnuda azul. Toda la cabeza y alto pecho negros, las plumas hirsutas y aguzadas; alta espalda, alas y cola negras; extenso parche escapular blanco y amplios márgenes blancos en rémiges internas; collar nucal, hombros, rabadilla y bajas partes inferiores amarillo naranja brillante, o como arriba pero alta espalda amarilla cruzada por banda negra (I. icterus metae) (Hilty & Brown, 1986). Las poblaciones con la rabadilla anaranjada han sido separadas en especies, Icterus icterus jamacaii e Icterus icterus croconotus, que exhiben ciertas diferencias como la no usurpación de los nidos de otras especies (McNish, 2007). briefDescription:

dataType:
identifier: reproductionUnstructured: Son monógamos durante la temporada de reproducción (permanecen juntos por todo un
año); la cual varía según la ubicación; entre marzo a septiembre en la mayor parte de Sudamérica; mayo a junio en Venezuela y durante todo el año en las Antillas (EOL, n.d.). Se adueñan de nidos abandonados de especies como el Bichofué Gritón (Pitangus sulphuratus), caciques y otras especies de turpiales (Hilty & Brown, 1986). La incubación dura entre 15 a 16 días en promedio; pone 3 huevos blancos teñidos de ante rosáceo y punteados densamente y marcados de café alrededor del extremo mayor (Hilty & Brown, 1986). Los polluelos recién nacidos son alimentados por ambos padres; los juveniles duran en el nido entre 21 a 23 días y luego viajan con sus padres a un lugar de descanso (nido robado) (EOL, n.d.).

behaviorUnstructured: Usualmente en solitario, se puede observar en parejas y pequeños grupos familiares (Hilty & Brown, 1986); los machos son reconocidos por sus melodiosos cantos en las primeras horas de la mañana y durante el día; mientras que las hembras cantan con menos frecuencia, los machos cantan para establecer su
territorio (EOL, n.d.).
Canto registrado en el centro de Venezuela un fuerte y placentero tau chiiír, tau chiiír repetido hasta nueve veces, o un chir tou, chir tou, a veces un taau chu chíra o frases similares (Hilty & Brown, 1986). También vocaliza un silbido

fuerte y melodioso fui tiu (Narosky & Yzurieta, 2010).

distributionUnstructured: El Turpial Real se distribuye en el norte y centro de Sudamérica; norte y centro de Venezuela (EOL, n.d.); Trinidad, Aruba, Curazao y Margarita; introducido a Puerto Rico y Santo Tomas (Hilty & Brown, 1986). En Colombia desde el sur de la Guajira a lo largo del suroriente de la Sierra Nevada de Santa Marta hasta Valencia (Icterus icterus ridgwayi); este de los Andes, norte de Arauca (I. icterus metae), probablemente norte de Vichada (I. icterus icterus) (Hilty & Brown, 1986).

Se distribuye desde el nivel del mar hasta los 700 msnm (principalmente a menos de 400 msnm) (Hilty & Brown, 1986). También a los 2600 msnm, en la Sabana de Bogotá, donde posiblemente sus registros se deben a poblaciones reproductivas residentes o individuos escapados.

abstract: El Turpial Real es una ave grande con cola larga, mide aproximadamente 23 cm, tiene pico robusto y cónico. Ojos amarillos rodeados por una extensa área desnuda azul, toda la cabeza y alto pecho negros, hombros, rabadilla y bajas partes inferiores amarillo naranja brillante (Hilty & Brown, 1986). Usualmente solitario, parejas y pequeños grupos familiares, frecuenta los bosques caducifolios, de galería y áreas abiertas con árboles aislados (McNish, 2007); también en matorrales y monte seco (Hilty & Brown, 1986). Esta especie tiene un rango muy grande de distribución; la tendencia de la población es estable, por lo cual se considera en preocupación menor (BirdLife International and NatureServe, 2014).
