fullDescriptionUnstructured: El Gallito de Ciénaga mide de 22 a 26 cm, es una ave acuática de constitución delgada, con dedos y uñas extremadamente largos, pico fino; alas redondeadas, espuela amarilla generalmente inconspicua (Asociación Bogotana de Ornitología, 2000). Los adultos presentan pico amarillo en la punta y rojo en la base, escudo frontal con dos lóbulos y carúnculas rojas a cada lado del pico; cuerpo, cabeza, cuello y cola completamente negros; remeras amarillas verdosas, presentando un contraste muy llamativo con el resto del plumaje en vuelo. Patas amarillo verdosas (Asociación Bogotana de Ornitología, 2000; Hilty & Brown, 1986). Los inmaduros son por encima café con la coronilla, nuca y lista ocular negras, contrastando con una lista superciliar y la región ventral

blanca; pico café; carúnculas y escudo frontal pálidos, a menudo ausentes (Hilty & Brown, 1986). briefDescription:

behaviorUnstructured: Es una especie confiada y tranquila, solitaria o en pequeños grupos dispersos en los humedales. Mientras camina ocasionalmente levanta las alas, las cuales mantiene abiertas por unos segundos después de aterrizar (Asociación Bogotana de Ornitología, 2000; Hilty & Brown, 1986). Vuela sobre las ciénagas con rápidos aleteos alternados con cortos planeos. En vuelo mantiene las patas levantadas. Utiliza sus dedos y garras para distribuir el peso de su cuerpo cuando camina sobre la vegetación, especialmente mientras se está alimentando (Asociación Bogotana de Ornitología, 2000; Hilty & Brown, 1986). Las hembras suelen ser más

grandes que los machos y defienden territorios grandes, dentro de los cuales varios machos tienen territorios pequeños. Por ser una especie acuática sabe nadar, pero no es muy común que lo haga (Alderfer et al., 2006; Hilty & Brown, 1986).

El Gallito de Ciénaga es una especie ruidosa, emite reclamos agudos y secos, o con calidad nasal y áspera: uiik, uiik, uiik o kiii-kik, kiii-kik (Asociación Bogotana de Ornitología, 2000). Otra vocalización común cuando se encuentra forrajeando es un fuerte ka-ka-ka-ka o un jiii-jiii-jiiik; cuando se encuentra en vuelo puede emitir un quic-quic, quicquic en forma de parloteo carcareado (Hilty & Brown, 1986; Narosky & Yzurieta, 2010).

distributionUnstructured: El Gallito de Ciénaga se distribuye desde el occidente de Panamá, Costa Rica hasta el oriente de Perú y el norte de Argentina (Asociación Bogotana de Ornitología, 2000). En Colombia esta especie se ha registrado desde el occidente de la Guajira, valle del Magdalena, valles medio y alto del Cauca; en los Andes desde Norte de Santander hasta Caquetá y Vaupés (Hilty & Brown, 1986; Narosky & Yzurieta, 2010). Se encuentra con más frecuencia por debajo de los 1000 msnm, pero ocasionalmente se ha registrado a los 2600 msnm en el Altiplano Cundiboyacense y a los 3000 msnm en las lagunas de Chingaza (PNN Chingaza-Cundinamarca) (Asociación Bogotana de Ornitología, 2000; Hilty & Brown, 1986).

Bogotana de Ornitología, 2000; Hilty & Brown, 1986; Narosky & Yzurieta, 2010). Se encuentra solitaria o en pequeños grupos dispersos en los humedales, caminando sobre la vegetación flotante o en aguas pandas. Levanta y exhibe las alas cuando se les perturba (Hilty & Brown, 1986). Es una especie común y con un rango de distribución muy amplio; la tendencia de la población es estable (BirdLife International and NatureServe, 2014).
